

Handle-It® Track Guards are designed to protect overhead door tracks. Guards prevent damage and costly repairs to tracks caused by material handling equipment. Slant design eliminates a protruding point to keep workers safe. Product features highly visible and durable Handle-It yellow powdercoat.

FEATURES AND BENEFITS

- Handle-It® Track Guards help prevent damage to the overhead door tracks more efficiently than conventional pipes embedded into the concrete floor
- These steel protectors provide a low cost method of reducing damage to overhead door tracks hit by moving vehicles
- Handle-It® Track Guards fasten to the floor and to the wall, wrapping around the overhead door track on two sides, closely fitting and protecting the track from damage in collisions
- These ½" thick steel protectors are easily mounted by securing to the concrete floor using three ½" diameter wedge anchors. You can add extra security by attaching to the wall with four anchors
- Handle-It® Track Guards do not interfere with dock operation and eliminate dock downtime and expensive repairs to track
- Tapered top edge to eliminate pinch point
- 48" standard height is offered. Custom heights available by special order
